EXPERIENCE

- POD

Senior Software Engineer (Full-time)

Remote

Jun 2025 - Present

1. Rebuilt the marketing website from scratch with mobile-first responsiveness in close collaboration with designers, introducing micro-interactions and motion design, improving Lighthouse score to 90+ and strengthening SEO using PayloadCMS for content management.

2. Designed and implemented the mobile experience for the bet tracker page, significantly improving usability and interaction flow for mobile users.

3. Led evaluation and end-to-end delivery of native mobile apps using Capacitor by restructuring the codebase for web/mobile separation and handling App Store and Play Store releases, overcoming iOS Safari PWA notification limitations.

4. Made the codebase AI-ready by defining AGENTS.md and DESIGN.md workflows, and establishing a scalable engineering system through CI automation (linting, type-checking, builds), enforced code quality standards, and developer experience improvements including formatting, PR templates, and conventional commits.

5. Partnered with an external product studio to ship a V2 POD dashboard spanning alerts, tracker, and wire modules, improving overall product UX across multiple workflows.
- Harmony

Frontend Engineer (Full-time)
